Community Health Care, Inc

Bridgeton , NJ

School Action Grant

SM52988

Congressional District: NJ-02

FY 99 Funding: \$149,114

Project Period: 9/30/99 - 9/29/00

The applicant will serve about 60 high-risk adolescents and their families through the Family Intervention Program (FIP). A school-based program, FIP involves teams, including a trained family therapist and a community resource specialist, that identify family members and community members concerned about the youngster, create a family structure and community team that provides consistent direction for the youth at risk, conduct family therapy, and connect the youth and his/her family with community resources to support them.

Mental Health Association in New Jersey

Montclair , NJ

Consumer Networking

SM52498

Congressional District: NJ-08

FY 99 Funding: \$60,000

Project Period: 9/30/98 - 8/31/01

The goal of the Consumer Provider Association of New Jersey (CPA) is to establish a statewide association of consumers of mental health services who are working as providers of mental health services. This program is designed to develop and enhance the growing role of consumer providers in the mental health system, as an outgrowth of the increasing numbers of qualified consumer providers being hired. The CPA would perform the following functions: 1) identify issues among consumer providers such as equitable salary levels, 2) strengthen organizational relationships by improving the collaboration among consumer providers, other professional organizations, etc, and 3) expand participation among consumer providers in the public and private mental health systems. The three year program will create an independent statewide CPA with an anticipated 150 members.

School Action Grant

SM53014

Congressional District: NJ-12

FY 99 Funding: \$150,000

Project Period: 9/30/99 - 8/31/01

The applicant will conduct the Life Skills Training upper elementary curriculum for 1100 students in the 4th and 5th grades in Monmouth County, New Jersey, beginning in academic year 1999/2000. Substance Abuse Resources Inc. staff will be trained in the model and will teach the program in the first and second years. In the second year of the project, elementary school teachers from the four school districts will receive training, ultimately taking over curriculum teaching duties.

Children's Mental Health Services

SM52926

Congressional District: NJ-03

FY 99 Funding: \$984,786

Project Period: 9/30/99 - 8/31/04

The New Jersey Burlington County Partnership will establish system reform on behalf of children and adolescents with SED and their families, creating enhanced collaboration among child-serving systems at the State, county and local levels by (1) pooling funds; (2) creating a common pathway to services; (3) expanding service array through efficient Medicaid program use; (4) enhancing cultural competence; and (5) ensuring family partnership in the program. Outcomes will be measured in terms of satisfaction, stability across life domains, reduced delinquency and out-of-family placements, improved educational attainment, reduced wait for services, among others.

Community-Initiated Grants

SP08628

Congressional District: NJ-01

FY 99 Funding: \$377,924

Project Period: 9/30/99 - 9/30/02

The school-based project, Jovencitas Program (Little Women), will target low-income, urban Hispanic female middle school students. The goal of Jovencitas Program is to provide North Camden Latino adolescent females attending the Pyne Poynt Family School with knowledge and skills to reduce potential motivation to engage in drug uses and high-risk behaviors by increasing their knowledge, social and personal competency skills. This proven curriculum model educates youth about drugs and teaches resistance and stress management skills, with the goal of enhancing students' ability to make healthy informed decisions regarding drug use. Augmenting the curriculum will be mother-daughter workshops, summer community service activities, and ongoing resource and referral. The program will address two domains: individual (girl) and their families.

Newark, NJ

Family Strengthening

SP08733

Congressional District: NJ-10

FY 99 Funding: \$96,123

Project Period: 9/30/99 - 9/29/01

The Rutgers College of Nursing in collaboration with Rutgers School of Criminal Justice will select and implement a strengthening family intervention program for the families who reside in three Newark Housing Authority housing projects. The families who reside in these apartment complexes are at risk for a wide range of public health problems that could be diminished by the appropriate family strengthening intervention. The goals of this project are to: build immediate capacity within the Rutgers College of Nursing to implement effective family interventions; to add to the knowledge base regarding cultural and other adaptations required for the families; and to identify key components of the decision making regarding the selection of the family strengthening intervention for these families. Long term goals are to increase family resilience, reduce familial substance abuse, and build capacity to assist families.

Targeted Capacity Expansion for Substance Abuse Treatment
and HIV/AIDS

TI12161

Congressional District: NJ-10

FY 99 Funding: \$317,748

Project Period: 9/30/99 - 9/29/02

The program proposes to target African American males and females between the ages of 19 and 55 especially those who live at or below the poverty line. The proposed project will provide services to 250 hard to reach heroin abusers and their families during the life of the project. The objective is to provide minority individuals with access to services provided by those agencies in the community with whom the program has linkage agreements. The project will also target pregnant women on opiates as well as those who have been diagnosed as having HIV or AIDS.

Targeted Capacity Expansion for Substance Abuse Treatment
Congressional District: NJ-01

Trenton, NJ
TI1949

FY 99 Funding: \$475,000
Project Period: 9/30/99 - 9/29/02

To expand targeted substance abuse treatment capacity to serve substance abusing adolescents and their families. Over a three year period this project will serve an additional 528 clients and family members.

New Jersey Department Health and Senior Services
Treatment Outcome and Performance Pilot Studies
Congressional District: NJ-14

Treton, NJ
TI1471

FY 99 Funding: \$506,766
Project Period: 9/30/98 - 9/29/01

The purpose of the New Jersey TOPPS II project is to respond to the States need for an ongoing, user-friendly Outcomes Monitoring System (OMS). The system, using the Addiction Severity Index (ASI) and the Treatment Services Review (TSR) as its basic instruments, will be designed to measure patient status in the ASI's seven domains at both baseline and at a 12 month, post baseline follow-up. In this way, treatment outcomes can be measured with the potential cost offsets estimated for both New Jersey's Division of Addiction Services and other State agencies. The primary data to be collected through this study will be linked with administrative data available through the State. These data include substance treatment encounter data, Medicaid claims, welfare eligibility, criminal justice (both arrest and corrections information), and other health and social indicator data. In this way, an integrated MIS can be built that incorporates information on both the utilization of State services and cost data with the primary data collected through the ASI and TSR. The addition of the administrative data can help validate primary data results and contribute to the development of the cost analyses. New Jersey will also collaborate with other States in the development of a set of data elements and outcomes measures that can become a national inter-State model. NEW MEXICO
